**Open Source Equivalents**

article about Linux Equivalents site:
http://www.freesoftwaremagazine.com/blogs/finding_gnu_linux_replacements_for_windows_software
The Linux Equivalent Project http://linuxeq.com/
Brief Description: Has a table with Windows Programs (Some licensed, some free) and the Linux Equivelents. Some Linux equivalents have Windows versions, others don't. Will probably be useful. (Zach)

http://www.linuxrsp.ru/win-lin-soft/table-eng.html
Brief Description: Has a table with Type of Program, Windows Programs (Some licensed, some free), and Linux Programs that fall under each type. Will probably be useful. (Zach)

http://www.linux.ie/newusers/alternatives.php (another list of alternatives to windows software)
Brief Description: Mostly Linux software. Might be useful, but probably not... doesn't look like it has anything the 2 above didn't have. (Zach)

http://www.osalt.com/ (find open source alternatives to commercial software)
Brief Description: Has OS and Commercial software listed (seperatley) by category for different operating systems. Will probably be useful (easy to navigate, so good to link to if nothing else). (Zach)

http://swik.net/Windows+open-source This actually isn't the site I don't think, it links to: http://www.linuxeq.com/ I'm guessing that's what you meant, Todd? (-Ryan) *... looks like a real link to me...--Todd* ... What I mean is that your link doesn't go directly to OS equivalents, since it's under that category here. (-Ryan)

Dreamweaver: http://www.aptana.com/ This thing looks pretty promising, I haven't been able to look at it much, but it's neat so far. (-Ryan)
http://www.nvu.com/index.php
I'm installing aptana and nvu (per Jake's recommendation). Dreamweaver has been my wysiwyg of choice for years now so I'll see how these stack up (Keegan)

**Open Source Development Labs** (OSDL)
http://groups.osdl.org/workgroups/dtl/desktop_architects/

http://www.osdl.org/lab_activities/desktop_linux
This is now found at http://old.linux-foundation.org/lab_activities/desktop_linux

http://www.desktoplinux.com/news/NS5481370522.html

http://groups.osdl.org/apps/group_public/download.php/2719/DTL_Datasheet_090706_01.pdf

This OSDL group has merged with The Free Standards Group, and formed The Linux Foundation. All but the one link still work.

**Random Links**
